

Setting up artwork for Spot Gloss uv

1. Choose the correct Pantone color

- Open the Pantone Solid Coated swatch book
- Select Pantone 102

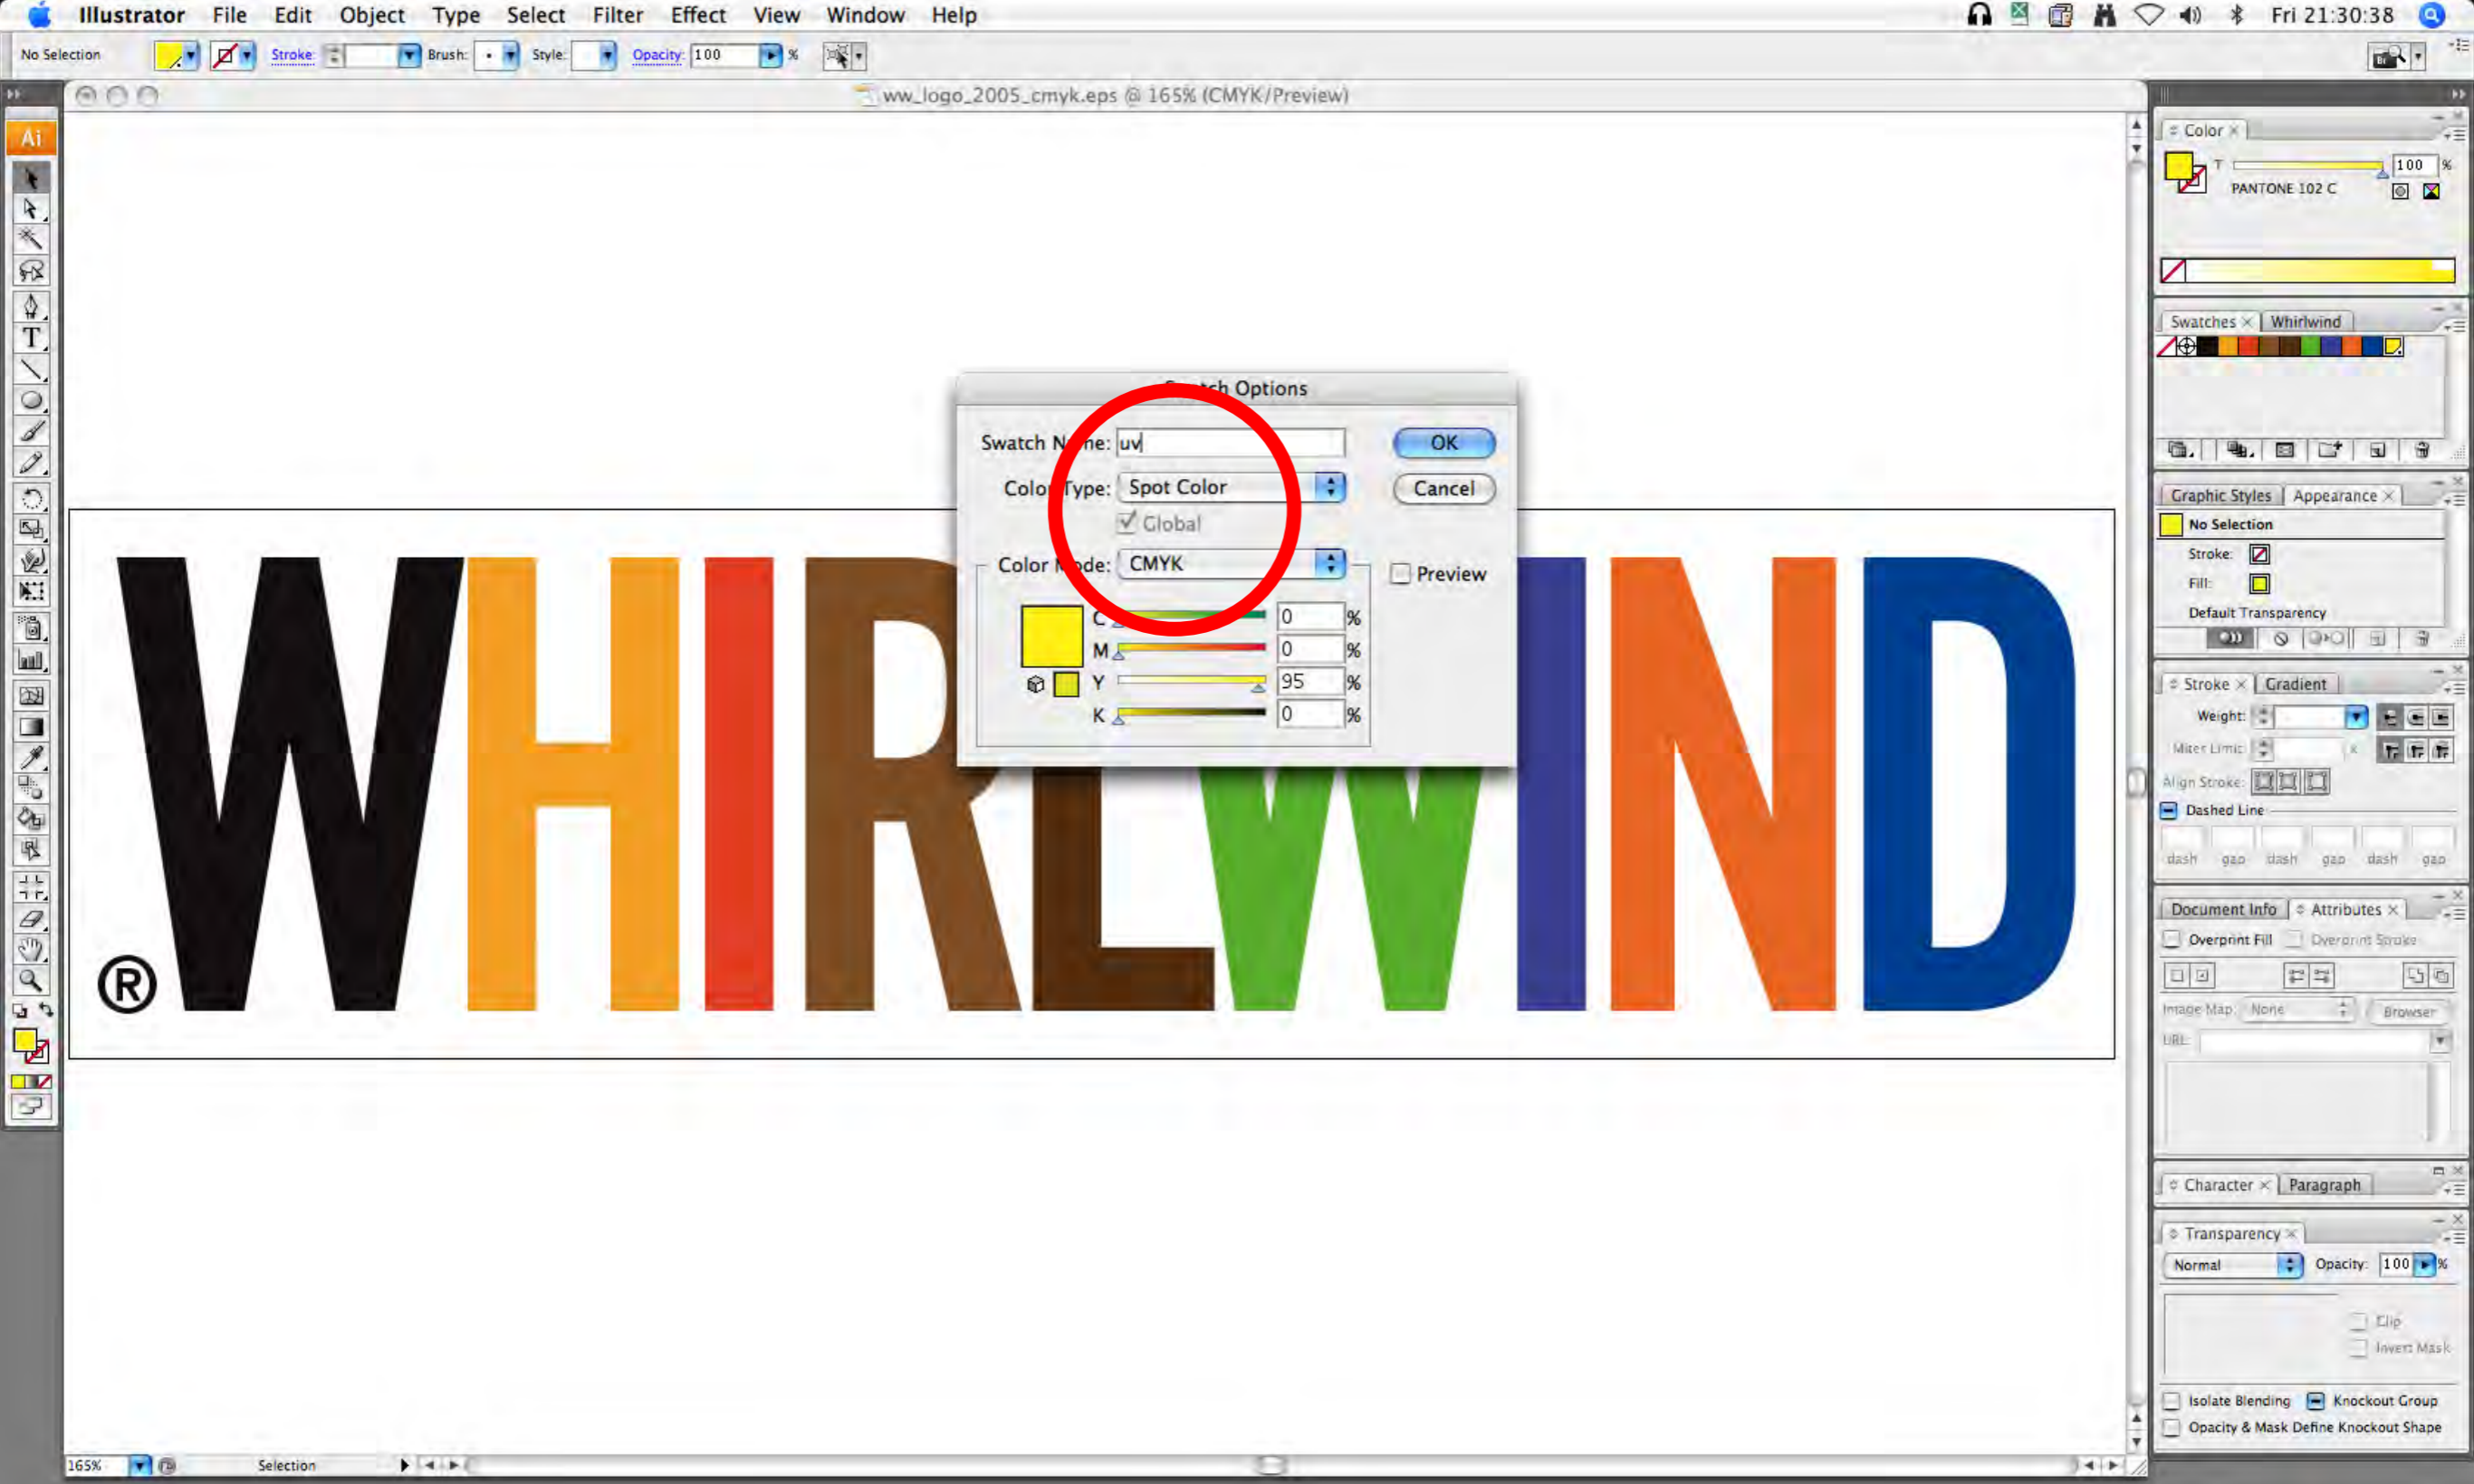

® WHIRLWIND

2. Rename the Pantone color

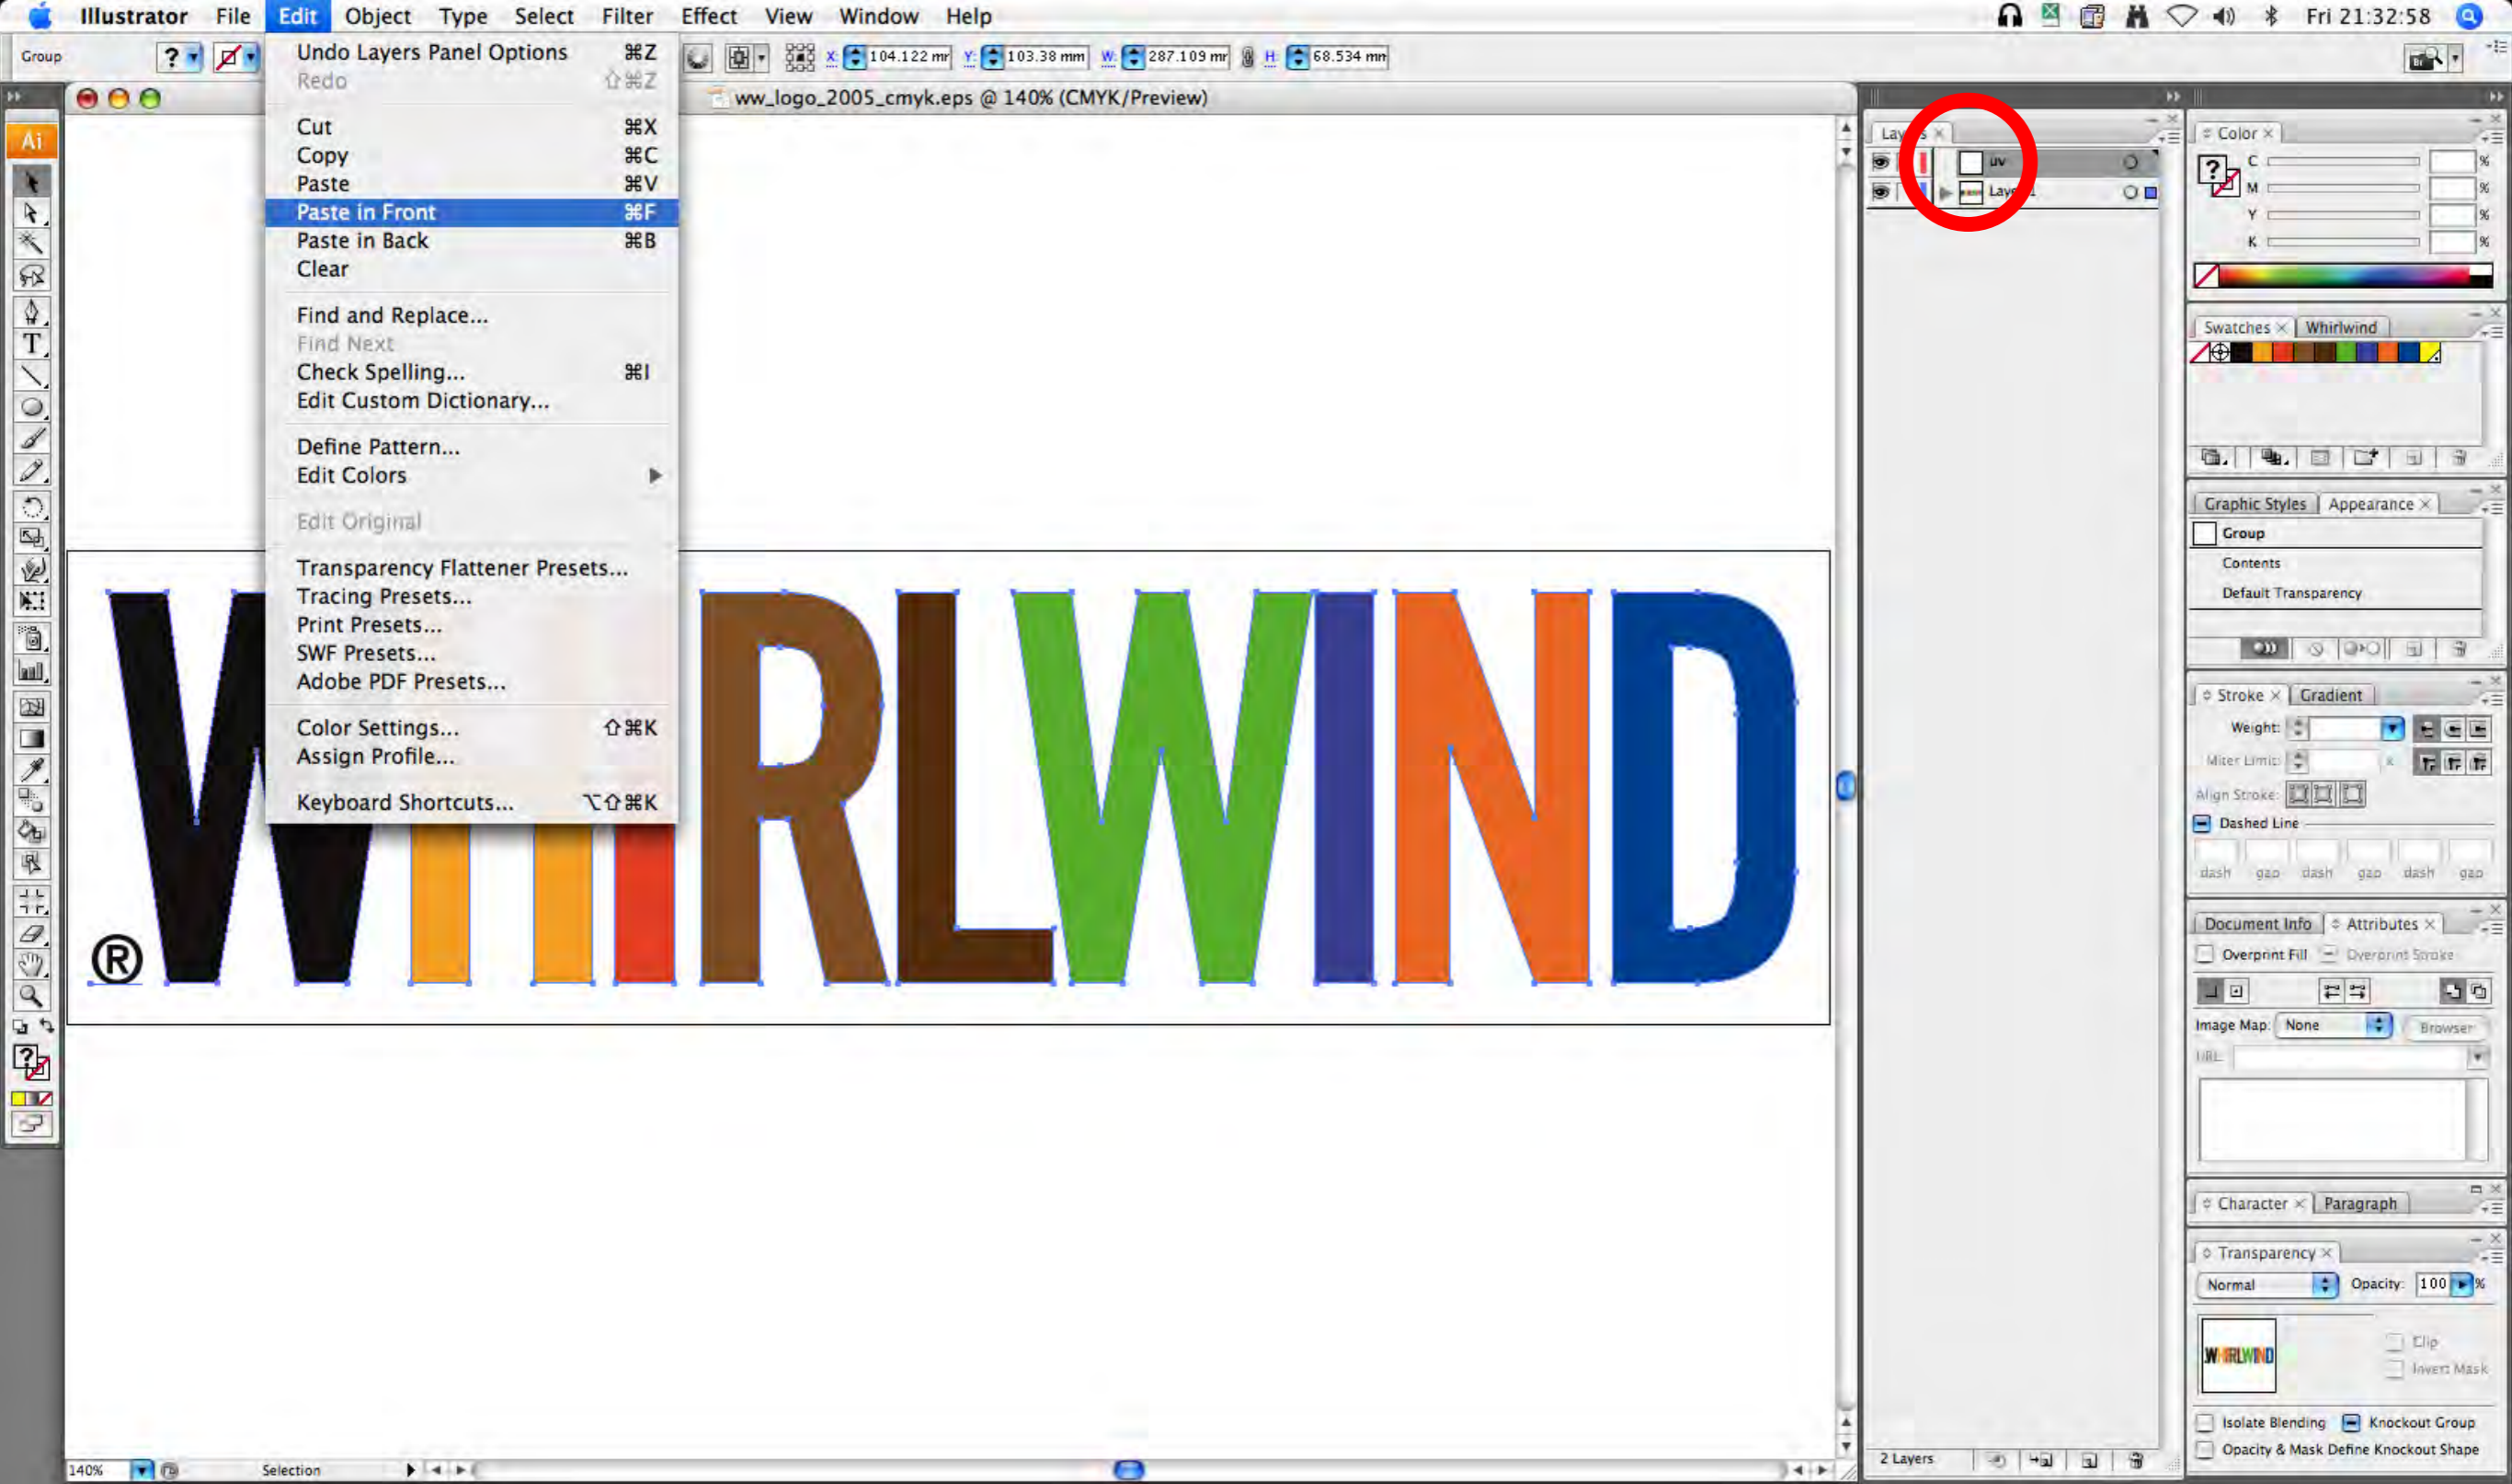

- From the swatches window, double click the new colour
- Change the Color Mode to CMYK
- Manually rename to uv (all lower case)

3. Copy the area requiring spot uv to a new layer

- Select the artwork requiring spot uv
- Copy
- Paste into a new layer named uv

® WHIRLWIND

4. Define the spot uv area

- Select the artwork requiring spot uv from the uv layer
- Click the Fill option in the Color window
- Select the new uv color
- Set the selected artwork to Overprint Fill in the Attributes window

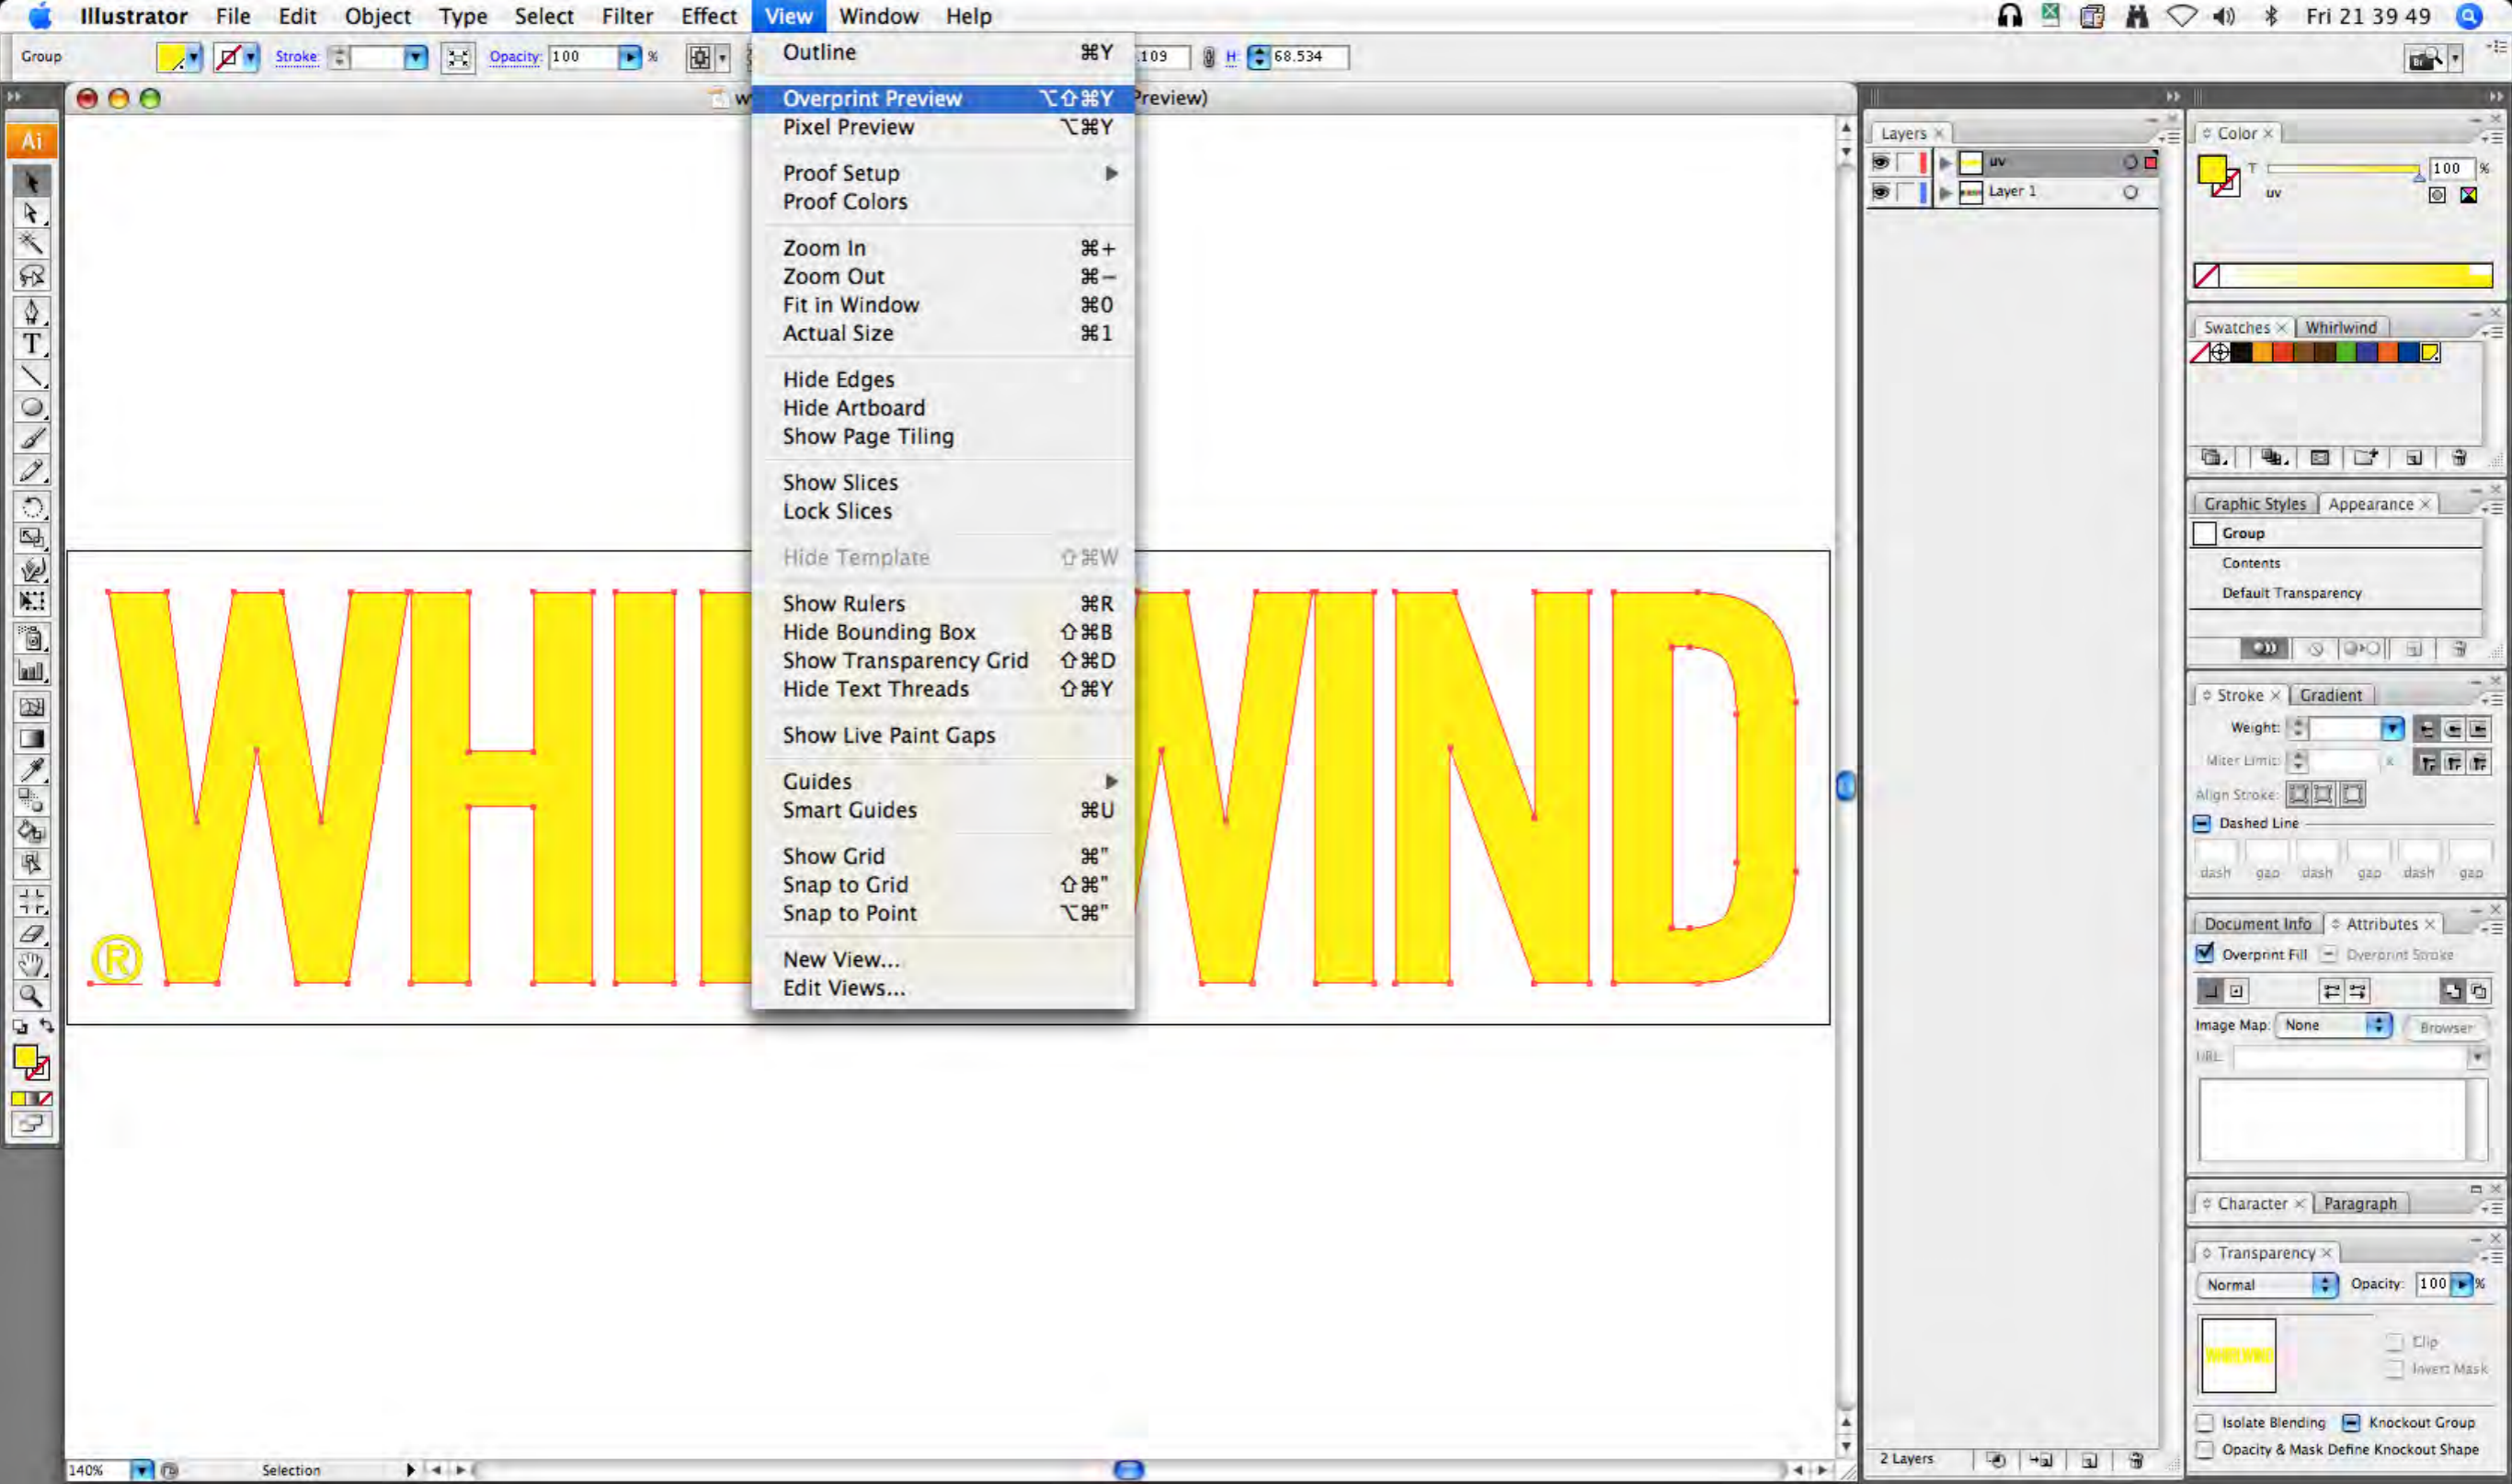

® WHIRLWIND
